### Message from the Guest Editors

Dear Colleagues,

As is well known, tobacco or tobacco smoke is made up of more than 7000 chemicals, and dozens of carcinogens are contained in the mixture. In addition, smoking is the leading cause of chronic obstructive pulmonary disease. Although evidence for a causal relationship between smoking and these diseases has been demonstrated by many researchers, the scientific evidence is still scarce. Thus, there are still significant limitations when it comes to curing these diseases. The aim of this Special Issue of *Toxics*, “Tobacco Smoke Exposure and Related Diseases” is to publish articles that study tobacco- or tobacco-smoke-related diseases in the pharmacological and toxicological field. The submission of hypotheses, opinions and commentaries, computational or modeling studies, and meta-analyses is also welcomed.

Prof. Eun-Jung Park

Dr. Hyoung-Yun Han

## Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Toxicology*) / CiteScore - Q2 (*Chemical Health and Safety*)
