Deadline for manuscript submissions:
closed (10 January 2022)

Message from the Guest Editor

Dear Colleagues,

Mycotoxins are prevalent in typical grains and legume seed meals fed to animals. Multiple mycotoxins are often present and detectable in most feeds and are hard to avoid in practical animal production environments. The duration of exposure, types of combination, and contamination level of mycotoxins can affect the nutrient metabolism and physiological status of animals. This Special Issue will include original research papers and review articles investigating the impact of mycotoxins in naturally contaminated feeds in various combinations and at different levels on the nutrient metabolism and physiological status of animals.

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.
Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q1 (*Toxicology*)
