#### **Message from the Guest Editors**

Dr. Alicia Rodríguez Deadline for manuscript submissions: 30 June 2024

Mycotoxins are a diverse group of toxic secondary metabolites derived from mold fungi, which are classified as plant pathogenic fungi that infect plants and cause losses in the quantity and quality of yields. Furthermore, they can cause damage under favorable conditions during storage through saprophytic growth and the accumulation of mycotoxins, resulting in the contamination of a wide range of feed and dietary products. Mycotoxins enter the food chain either directly via the consumption of contaminated food or indirectly via feed, thereby endangering human and animal health. The high stability of mycotoxins allows them to persist during food processing and impair food safety. The regulation of mycotoxin production in mold fungi is a multifactorial process, involving inherent and environmental regulators, and is hence difficult to predict. Therefore, the development and refinement of reliable diagnostic methods are of crucial importance to keep up with an ongoing diversification.

The aim of this Special Issue is to collect papers related to the mycotoxin spectrum found in processed food and feed, including original articles, review articles, and short communications.

### Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peerreviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases. **Journal Rank:** JCR - Q1 (*Toxicology*) / CiteScore - Q1 (*Toxicology*)
