Solar Wind Structures and Phenomena: Origins, Properties, Geoeffectiveness, and Prediction

Guest Editors:

Dr. Yuri Yermolaev

Space Research Institute, Russian
Academy of Sciences, 117997
Moscow, Russia

Dr. Vladimir A. Slemzin

P.N. Lebedev Physical Institute,
Russian Academy of Sciences,
119991 Moscow, Russia

Dr. Volker Bothmer

Institute for Astrophysics, Georg-
August-University of Göttingen,
37077 Göttingen, Germany

Message from the Guest Editors

The Special Issue will be devoted to recent progress in the physics of solar wind and heliospheric media, including results of actual missions providing new insights into the structure and origins of solar wind and solar corona, such as the Parker Solar Probe and Solar Orbiter.

We invite contributions on all aspects of solar, helio-, and magnetosphere physics, starting from the solar corona, into solar wind, including the inner heliosphere, the Earth's orbit, and beyond.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

The multidisciplinary *Universe* journal is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the editorial board, I extend my welcome to this new journal and look forward to hearing from the interested contributors and learning about their valuable research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Astronomy & Astrophysics*) / CiteScore - Q2 (*General Physics and Astronomy*)
