Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to provide readers with current knowledge about vaccine epidemiology through high-quality research papers and reviews.

Potential topics include, but are not limited to, the following:

1. Epidemiology of vaccine-preventable diseases (VPDs);
2. Immune responses to vaccines;
3. Evaluation of vaccine efficacy and safety (pharmacovigilance);
4. Comparison of disease burden before and after vaccination;
5. Barriers associated with vaccination campaigns (vaccine hesitancy, vaccine inequity);
6. Technical, pathogen-related, host-related, vaccine-related, environmental, management, and climatic factors of vaccine effectiveness.

Both original research articles and reviews are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
