submissions:

31 December 2024

Message from the Guest Editors

Dear Colleagues,

The advent of anti-SARS-CoV-2 mRNA vaccines has drastically reduced the morbidity and mortality associated with COVID-19, allowing a return to rather normal living conditions in a small number of months. Since the beginning of the vaccination campaign, vaccines have proven to be extremely effective in reducing complications during the disease, and there have been various reports of adverse events which, however, have been much lower than the benefits of vaccination. In this Special Issue, we intend to collect original articles, case reports, case series, reviews, and possible comments on this topic, with the hope of hosting scientific contributions that can stimulate discussion and herald new advances in this area.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access:— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
