Deadline for manuscript
submissions:

31 January 2025

Message from the Guest Editors

Dear Colleagues,

The pharmacoepidemiology of vaccines provides near-real-time monitoring and scientific information for evidence-based decision-making. The field involves assessing the risks and benefits associated with vaccination programs, which includes monitoring adverse events following vaccination, evaluating vaccine effectiveness in preventing disease, and studying factors that influence vaccine uptake and effectiveness. This field provides evidence-based information to guide decision-making regarding vaccine development, recommendations, and implementation strategies. We are inviting original articles, review articles, brief communications, and case reports related to "Pharmacoepidemiology in Vaccine Safety and Efficacy" for this Special Issue.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
