Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editor

Dear Colleagues,

For this special issue, we would like to invite researchers and experts from diverse disciplines to publish high quality regular research papers and reviews that elucidate the immunopathogenic mechanisms and control strategies of influenza viruses. Our aim is to encourage scientists to present their experimental findings and theoretical insights in the form of open-access publications. It is essential that contributors provide comprehensive details of their experiments to ensure reproducibility. Furthermore, authors are encouraged to include computed data or supplementary materials containing full procedural information. The overarching objective of this special issue is to advance our understanding of the complex immunopathogenic mechanisms associated with influenza viruses. By fostering collaboration across disciplines and facilitating the dissemination of detailed research outcomes, we aim to promote the development of innovative strategies for controlling influenza virus infections.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
