Message from the Guest Editors

Dear Colleagues,

There is a growing number of infectious or parasitic diseases of small ruminants (sheep and goats) in which the use of vaccines is the only efficient method for control or prophylaxis. In some of them, vaccines have been used for a long time, but new knowledge and new products are emerging for better efficacy. In other cases, new vaccination products are under development. Thus, this is an area where new achievements are appearing every day, and deserves a Special Issue of *Vaccines*.

This Special Issue “Vaccines in Small Ruminants” welcomes manuscripts in all areas related to recent scientific and technical progresses on vaccine research in sheep and goats, such as (but not limited to) vaccine development, trials, animal models, immune response, mechanisms of protection, evaluation, cross-reaction, vaccination compatible diagnosis (DIVA), etc. Both traditional and novel vaccines and adjuvants and every disease affecting these species are of interest.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
