Molecular Immunonutrition Group, Madrid Institute for Advanced Studies in Food (IMDEA-Food), 28049 Madrid, Spain

**Dr. Juan Antonio Giménez-Bastida**

Laboratory of Food and Health, Research Group on Quality, Safety and Bioactivity of Plant Foods, Department Food Science and Technology, CEBAS-CSIC, P.O. Box 164, Campus de Espinardo, 30100 Murcia, Spain

### Message from the Guest Editors

Complex cellular and humoral networks of adaptive immune cells and metabolic products are well known. However, fundamental questions remain unanswered about the interconnexion between innate and adaptive immune response(s) to immunoevasion. These will improve our knowledge on immunometabolic diseases, cancer, virus clearance, and recovery of immunocompetence. Identification and development of those with a concerted perspective will overcome the usually fragmented and compartmentalized approach to addressing the underlying immune alterations. Integrating both components in the context of its relationship to exposures (i.e., diet, environment, microbiota) and the host's intrinsic and modifiable factors and disease outcomes will contribute toward vaccine and immunotherapeutic design and evaluation.

Deadline for manuscript submissions:

**30 June 2024**

an Open Access Journal by MDPI

## Editor-in-Chief

Diseases, College of Veterinary  
Medicine, University of Georgia,  
Athens, GA 30602-7387, USA

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

## Author Benefits

**Open Access:**— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

**Journal Rank:** JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
