Message from the Guest Editors

Dear Colleagues,

In recent years, we have witnessed the intense promotion of precision livestock farming (PLF) technologies, which hold the promise of revolutionizing the way we breed dairy cattle and sheep. "Agriculture 4.0" describes both the inside and outside communication of farm operations, which implies the presence of digital information in virtually all farm activities. Agriculture 4.0 facilitates this digital transformation of primary production by handling a massive amount of data via Internet-based interfaces. In fact, Agriculture 4.0 is laying the groundwork for the following stage of agricultural development, which will include automated decision-making systems and operations. A central computer controls machinery connected to the internet as part of smart farming, which uses cloud computing and the Internet of Things (IoT) to improve productivity and the quality of products. These days, there are affordable, effective, and powerful tools available thanks to recent technical advancements. These include devices and services such as cameras, microphones, sensors, wireless networking gear, web access, and cloud storage.

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q2 (*General Veterinary*)
