### Message from the Guest Editor

Dear Colleagues,

It is well known that current feed and food production are environmentally unsustainable. New research insights have shown that insects and agricultural by-products could contribute to the sustainability of animal nutrition.

For this Special Issue, we are interested in research papers or reviews aimed at evaluating the use of insects or agricultural by-products derived from agronomy practices, the food industry, or market disposal, as ingredients for animal feed, in order to reduce loss in the production chain while improving the health status of the livestock and the nutritional quality of the products.

Dr. Simone Mancini

## Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [PubAg](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q2 (*General Veterinary*)
