Message from the Guest Editors

Dear Colleagues,

Digital pathology is now a remarkable field of innovation in the current diagnostic setting, with education and research changing the paradigm of microscope-based pathology. At present, digitized pathologic images stored in the cloud can be easily transmitted and further analyzed by computer-aided pathology systems making use of technologies such as machine learning algorithms and deep neural networks helping in the disease classification, biomarker discovery, and prognosis prediction. In the turnaround of this digital revolution, the aim of this Special Issue is to publish original research works and reviews on the topic of veterinary digital pathology and applied artificial intelligence systems.

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q2 (*General Veterinary*)
