Message from the Guest Editor

Dear Colleagues,

Viruses in the parvoviridae family constitute a most diverse and intriguing field of research. The aim of this Special Issue of *Viruses* is to compile the newest contributions in the field of parvovirus research, especially encouraging new insights and research on unresolved issues, as well as new approaches exploiting systemic (–omic) methodologies. Evolution, structural biology, viral replication, virus-host interaction, pathogenesis and immunity, gene therapy, and viral oncotherapy are only a selection of the topics that can be of relevance to the community involved in parvovirus research and of interest to a wider audience.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
