Virology Research in South Africa—from a Great Legacy to an Optimistic Future

Guest Editors:

Prof. Dr. Burtram C. Fielding

Molecular Biology and Virology
Research Laboratory,
Department of Medical
Biosciences, University of the
Western Cape, Bellville 7535,
South Africa

Dr. Ziyaad Valley-Omar

1. Department of Virology,
National Health Laboratory
Service, Johannesburg, South
Africa

2. Faculty of Health Sciences,
Division of Medical Virology,
University of Cape Town, Cape
Town, South Africa

Deadline for manuscript
submissions:

1 September 2024

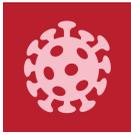

Message from the Guest Editors

Given the success of the previous Special Issue, we are excited to extend an invitation to our colleagues to participate in a second volume of this Special Issue. The second volume of the Special Issue of the journal *Viruses* will focus on “Virology Research in South Africa—from a Great Legacy to an Optimistic Future”. As a continuation of the First Volume, this volume aims to provide a comprehensive overview of research on HIV, viral hepatitis, influenza, respiratory syncytial virus (RSV), severe acute respiratory syndrome coronavirus type 2 (SARS-CoV-2), coronaviruses, other less studied respiratory viruses, zoonotic viruses as well as research on viral vaccines, vaccine development and clinical trials on viral vaccines conducted in South Africa. Other areas relevant to this issue are research related to antiviral resistance for HIV and other viral drugs. This issue is not restricted to research on human viruses, and we invite submission of all virology research from South Africa.

Director, HIV Dynamics and
Replication Program, Center for
Cancer Research, National
Cancer Institute, Frederick, MD
21702-1201, USA

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
