Message from the Guest Editor

Dear Colleagues,

We are currently experiencing one of the worst viral pandemics in recent history. The new coronavirus, SARS-CoV-2, has shown that we need to be prepared for new viral threats. This is true not only for emerging viruses but also for those seemingly under control. Moreover, due to global warming, some viruses may migrate from tropical regions to areas with a continental climate. Therefore, it is extremely important to exploit and interlink all possible resources and scientists worldwide in a battle against the (re)emerging threats posed by viruses. This Special Issue of *Viruses* aims to introduce state-of-the-art virology research in the Czech Republic, which is a country that has left a noticeable trace in the field of virology.

I look forward to receiving your submissions for this Special Issue.

Prof. Tomas Ruml

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
