

## Physical Virology - Viruses at Multiple Levels of Complexity

Guest Editors:

**Dr. Roya Zandi**

Department of Physics and  
Astronomy, University of  
California, Riverside, CA, USA

**Dr. Michael F. Hagan**

Physics and Biological Physics,  
Martin A. Fisher School of  
Physics, Brandeis University,  
Waltham, USA

**Dr. Charlotte Uetrecht**

Heinrich Pette Institute, Leibniz  
Institute for Experimental  
Virology, CSSB and European  
XFEL GmbH, Hamburg, Germany

Deadline for manuscript  
submissions:

**closed (10 July 2023)**

### Message from the Guest Editors

This Special Issue will present works by researchers with scientific expertise in virology, chemistry, material science, mathematics, physics, and engineering who share a common desire to (1) understand the biophysical mechanisms that enable and regulate viral lifecycles, (2) use this knowledge to develop and engineer novel nanotechnology platforms based on viral particles or other self-assembling structures, with applications including biomimetic materials and optoelectronics, and (3) broaden physical virology to leverage recent advances in cell biology and protein design. The COVID-19 pandemic has highlighted the need for these cross-disciplinary approaches to understand viral biology, predict their global spread and impact, and generate the fundamental knowledge that provides the foundation for the development of new treatments.

This Special Issue is dedicated to the GRC Physical Virology in January 2023. All the attendees of the meeting will be entitled to a special 600 CHF discount on the article processing charge. We have a possibility to select a few papers to be published free of charge based on the quality and novelty of the papers.

an Open Access Journal by MDPI

## Editor-in-Chief

### Dr. Eric O. Freed

Director, HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:**— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
