Deadline for manuscript
submissions:

closed (30 October 2023)

Message from the Guest Editor

Dear Colleagues,

The growing demand for clean water and the increasing contamination of water resources by toxic contaminants have motivated innovations in water and wastewater treatment and environmental remediation areas for the removal of recalcitrant contaminants. Some biological, chemical and physical techniques are used to acquire high-quality effluents in wastewater treatment. Nevertheless, these techniques have some restrictions related to the treatment efficiency, inactivation by toxic pollutants, high energy and cost requirements, production of secondary sludge, etc. Catalytic treatment of polluted water is considered a promising alternative for the removal of aqueous organic contaminants. Heterogeneous catalytic technologies involving the production of different reactive species have recently emerged with capabilities to convert organic contaminants in aqueous media. [...]

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

ECOLAB, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
