Modeling Hydraulics and River Dynamics Using Numerical Analysis and Soft Computing Methods

Guest Editors:

Prof. Dr. Mohammad Zounemat-Kermani

Water Engineering Department, Shahid Bahonar University of Kerman, Kerman 76169-14111, Iran

Prof. Dr. Ozgur Kisi

 Department of Civil
Engineering, Technical University of Lübeck, 23562 Lübeck,
Germany
Department of Civil
Engineering, Ilia State University,
0162 Tbilisi, Georgia

Deadline for manuscript submissions: closed (30 October 2023)

Message from the Guest Editors

Dear Colleagues,

The hydraulics and dynamics of water movement in rivers and open channels is of great importance in the diverse realms of hydrology and water sciences. Accordingly, in recent decades, several researchers have considered the accurate and proper simulation of these water bodies. Regarding the significance of the phenomena, researchers are invited to submit their studies related to the numerical modeling and/or soft computing simulation of river dynamics (and pertinent hydro-structures) to this Special Issue. The main outlines and scopes of this issue can be categorized as the following:

- Behavior and corresponding description of flow in rivers.
- Modeling flow in compound channels.
- Floodplain flow modeling.
- River flow and groundwater flow interaction.

[...]

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. Water invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
