## Novel Approaches to Nutrient and Pollutant Removal from Wastewater (Volume II)

Guest Editor:

**Prof. Dr. Mirna Habuda-Stanic**

Faculty of Food Technology  
Osijek, Josip Juraj University of  
Osijek, Franje Kuhaca 18, HR-  
31000 Osijek, Croatia

Deadline for manuscript  
submissions:

**20 August 2024**

### Message from the Guest Editor

The World Economic Forum ranks the water crisis in the top three global risks, while the General Assembly of United Nations (UN) has proclaimed the period from 2018 to 2028 as the UN Water Action Decade in order to improve educational outreach related to water and water pollution control and to improve communication to achieve water-related goals.

As the Guest Editor for this Special Issue, “Novel Approaches to Nutrient and Pollutant Removal from Wastewater (Volume II)”, I have the honour of inviting you to publish a feature paper in *Water*, as a contribution to achieving the UN Sustainable Development Goals, especially regarding Goal 6: Clean Water and Sanitation.

Within this framework, for this Special Issue, I would like to invite original research contributions, review articles, as well as short communications that emphasize and give an overview of the novel approaches to wastewater treatment, especially those focused on the latest achievements and novel techniques, materials, and methods for effective nutrient and pollutant removal from wastewater. Please feel free to reach out to me or [alexandra.wang@mdpi.com](mailto:alexandra.wang@mdpi.com) should you have any questions.

## Editor-in-Chief

### Dr. Jean-Luc PROBST

Laboratory of Functional Ecology  
and Environment, Centre  
National de la Recherche  
Scientifique (CNRS), University of  
Toulouse, Campus ENSAT,  
Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
