## Integrated Assessment of Flood Risk

Guest Editors:

### **Dr. Minglei Ren**

State Key Laboratory of  
Simulation and Regulation of  
Water Cycle in River Basin,  
Research Center on Flood &  
Drought Disaster Reduction of  
the Ministry of Water Resources,  
China Institute of Water  
Resources and Hydropower  
Research, Beijing, China

### **Prof. Dr. Gang Wang**

State Key Laboratory of  
Simulation and Regulation of  
Water Cycle in River Basin,  
Research Center on Flood &  
Drought Disaster Reduction of  
the Ministry of Water Resources,  
China Institute of Water  
Resources and Hydropower  
Research, Beijing, China

Deadline for manuscript  
submissions:

**closed (25 March 2024)**

### **Message from the Guest Editors**

Dear Colleagues,

Flooding is an extreme hydrological process in climatic events with enormous impacts on human society and ecosystems. Thus, assessing flood risks is critical for flood hazard mitigation and prevention. This Special Issue mainly focuses on the application of new concepts, new theories, and new methods in comprehensive flood risk assessment, with a view to providing systematic technical measures for flood hazard prevention and control. We invite submissions including, but not limited to, the following topics:

1. Comprehensive flood risk assessment-related theories, methods, and technical frameworks;
2. Flood control risk assessment of large-scale water diversion projects;
3. Flood risk assessment for small reservoirs and the impact of discharge on the downstream;
4. Flood risk assessment methods and techniques for small watersheds in hilly areas;
5. Flood risk quantitative assessment method;
6. Comprehensive assessment of flood risk from the perspective of resilience.[...]

## Editor-in-Chief

### Dr. Jean-Luc PROBST

Laboratory of Functional Ecology  
and Environment, Centre  
National de la Recherche  
Scientifique (CNRS), University of  
Toulouse, Campus ENSAT,  
Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
