Flood Risk Management and Resilience Volume II

Guest Editors:

Prof. Dr. David Proverbs

Professor David Proverbs BSc (Hons), PG Cert-Ed, PhD, MBA, PFHEA, FCIOB, FRICS Associate Pro Vice-Chancellor—Enterprise and Business Innovation De Montfort University, Leicester, UK

Prof. Dr. Bingunath Ingirige

Urban Resilience and Adaptation, Centre for Disaster Resilience, School of Science, Engineering and Environment, University of Salford, Manchester M5 4WT, UK

Deadline for manuscript submissions:

30 May 2024

Message from the Guest Editors

Dear Colleagues,

The first highly successful volume of this Special Issue, called Flood Risk Management and Resilience Vol 1, included 18 papers on a range of contemporary themes and issues linked to resilience. These included papers on topics, such as community response and perspectives, impact on farmers, vulnerability assessment, climate factors, evaluation of resilience, natural infrastructure and flood hazard mapping. The volume attracted wide international interest with contributions from researchers in various locations, such as Brazil, China, Indonesia. Japan, Malaysia, Pakistan, Thailand, Togo, the UK and the US. This second volume aims to build on these contributions and provides a further opportunity for researchers to publish their latest findings and discoveries in the dynamic and increasingly challenging area of flood risk management and resilience. [...]

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. Water invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to technological scientific domains and interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
