## Vulnerability Assessment of Agro-Systems to Hydroclimatic Extremes

Guest Editors:

**Dr. João Filipe Santos**

Civil and Environmental  
Engineering, Polytechnic  
Institute of Beja, 7800-309 Beja,  
Portugal

**Dr. Inmaculada Pulido-Calvo**

Departamento de Ciencias  
Agroforestales, Escuela Técnica  
Superior de Ingeniería, Campus  
El Carmen, Universidad de  
Huelva, 21007 Huelva, Spain

Deadline for manuscript  
submissions:

**25 July 2024**

### Message from the Guest Editors

The Guest Editors of this Special Issue would like to invite original research contributions that emphasize the following areas:

- Regulatory frameworks on territorial planning regarding the establishment of more resilient agricultural systems;
- Early warning systems for hydroclimatic disaster management;
- Communicational strategies for the improvement of the understanding on hydro-climatological impacts to stakeholders and decision makers at regional scale using case studies;
- Techniques to improve cultures' resilience to hydroclimatic extremes;
- New approaches on (a) the prevention and mitigation of hydroclimatic extremes and (b) adaptation strategies for future climate scenarios;

### Keywords

- hydroclimatic extremes
- innovative techniques on risk assessment
- agro-systems resilience
- incorporation of future climate change scenarios in the development of vulnerability assessment

## Editor-in-Chief

### Dr. Jean-Luc PROBST

Laboratory of Functional Ecology  
and Environment, Centre  
National de la Recherche  
Scientifique (CNRS), University of  
Toulouse, Campus ENSAT,  
Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
