Water Pollution Monitoring, Control, and Remediation

Guest Editors:

Dr. Ewa Janson

Główny Instytut Górnictwa,
Katowice, Poland

Dr. Izabela Chmielewska

Silesian Centre for Environmental
Radioactivity, Central Mining
Institute, 40-166 Katowice,
Poland

Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

Dear Colleagues,

The scarcity of water resources is a critical issue across Europe and worldwide. It is undoubtedly exacerbated by the documented impacts related to climate change and ensuing extreme drought periods. Water services and environmental stewardship in terms of diffuse and simple access to clean water are increasingly important, their vulnerability being, in the context of shortage of water resources, widely documented. This Special Issue on “Water Pollution Monitoring, Control, and Remediation” focuses on recent advances and prospects of water studies including, but not limited to, the following:

- Methods of monitoring and control of water parameters in terms of its quality and quantity;
- Control of water balance in the environment in relation to climate change impacts;
- Innovative solutions for the protection and remediation of water resources;
- Technologies and techniques that facilitate the reduction of surface and groundwater water pollution;

[...]

Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
