Sustainable Water Futures: Climate, Community and Circular Economy

Guest Editor:

Prof. Dr. Ataur Rahman
Core Member, Renewable Energy and Water Research Group (Sustainability and Resilience Theme), School of Engineering, Design and Built Environment, Western Sydney University, Penrith, Australia

Deadline for manuscript submissions:
closed (30 June 2023)

Message from the Guest Editor

Dear Colleagues,

Water is life, and no one can ignore the necessities of water in our life while humankind is facing both global and local water challenges such as climate change, water diversity loss, fresh drinking water scarcity and pollution. The need for sustainable water futures gains momentum as environmental and resource scarcity is increasing due to climate change. The transition and actions to the circular economy could be a nature-positive way of promoting a sustainable water future. Meanwhile, trickle-down economics could be reshaped following a bottom-up approach in the light of doughnut economics and circular economics in reducing the gap between people, water, nature, culture and civic engagement. The innovations and novel research work without undermining the planet by engineers, planners, architects, social and natural scientists could play a pivotal role in keeping positive planetary boundaries. [...]

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST
Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.
Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
