Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editor

Freshwater security is a highly important issue due to the severe consequences on human health as well as economic and environmental activities. Water is important for sustainability, development, and human well-being. Drinking water security and safety should be the first priority for day-to-day management of water utilities. Water needs to be safeguarded against any kinds of threats, regardless of intended or otherwise. As water supply systems are complex, they face several risks. Many tools to are available to confront such risks and to safeguard water security. Collaboration across sectors and communities is required to ensure safe water for all.

In this context, this Special Issue aims to provide insights into new perspectives on water security management. Specific topics to be included are: drinking water supply, water security, water safety [...]

Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
