Fluvial Sediment and Geomorphology

Guest Editor:

Dr. Riccardo Rainato

Department of Land,
Environment, Agriculture and
Forestry, University of Padova,
Padova, Italy

Deadline for manuscript
submissions:

closed (30 November 2023)

Message from the Guest Editor

This Special Issue welcomes submissions that investigate the relationship between sediment and fluvial systems, with particular attention to the implication for fluvial morphology and processes. All types of rivers systems will be considered, with particular interest in field analysis realized at any temporal and spatial scale.

Keywords

- fluvial sediment
- fluvial morphology
- fluvial processes
- sediment transport
- climate change

France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
