Dr. Vasileios Tzanakakis

Dr. Stavros Alexandris

Dr. Maria Psychogiou

Dr. Andreas Angelakis

Deadline for manuscript
submissions:

closed (31 July 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue “Climate Water and Soil” in the *Water* journal aims to discuss, identify, and address the potential problems arising from climate variability and/or change in water and soil resources. Research and review manuscripts dealing with climate monitoring and future climatic changes and interactions of climate with resources (water and soil), hydrological cycles, and the critical biochemical cycles of carbon and nitrogen are very welcome. Additionally, links between climate and natural and agricultural (crops) ecosystem productivity, resources’ quality, soil and water resource management, adaptation measures in the agricultural sector, water management to mitigate water scarcity, and water use efficiency issues are welcome.

In this Special Issue, the goal is for authors to respond to developing solid research on climate, water, and soil in a context that is sometimes missing in mainstream literature on climate. [...]

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
