Current and Emerging Issues Surrounding Water in the Americas

Guest Editors:

Prof. Thomas C. Harmon

Department of Civil &
Environmental Engineering,
University of California Merced,
USA

Prof. Natalia Hoyos

Departamento de Historia y
Ciencias Sociales, Universidad
del Norte, Baranquilla, Colombia

Deadline for manuscript
submissions:

closed (31 January 2019)

Message from the Guest Editors

The aim of this Special Issue is to assemble the latest interdisciplinary work on understanding current and emerging water and water-related issues in Central and South America. Contributions are welcome on such topics as hydrology and climate change, land use and integrated watershed management, limnology, paleo-environmental reconstructions, conservation biology, sustaining biodiversity, stakeholder engagement, water policy and governance, ecosystem services evaluation, environmental education and other topics associated with the connections between water, ecosystems, and people in the Americas. All such work should support a long-term vision of healthy and sustainable aquatic ecosystems.

Studies driven by science, engineering and social science are welcome, but all should endeavor to connect concepts and findings across disciplines. Field campaigns, long-term monitoring efforts, case studies, stakeholder surveys, and capacity building efforts are equally welcome. Work highlighting strategies, challenges and lessons learned in regard to international, interdisciplinary team building, data access, and sustaining long-term efforts is especially desirable.

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology
and Environment, Centre
National de la Recherche
Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
