## Groundwater Quality and Public Health

Guest Editors:

**Dr. Jianhua Wu**

School of Water and  
Environment, Chang'an  
University, Xi'an 710054, China

**Prof. Dr. Peiyue Li**

School of Water and  
Environment, Chang'an  
University, Xi'an 710054, China

**Dr. Saurabh Shukla**

Faculty of Civil Engineering, Shri  
Ramswaroop Memorial  
University, Barabanki 225003, UP,  
India

Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### Message from the Guest Editors

Groundwater is a primary source of water for nearly half of the world's population. Its quality has become as important as its quantity, as serious groundwater pollution has been identified in many regions and countries of the world. The contaminants in groundwater can seriously affect human health, inducing a number of waterborne diseases. This Special Issue "Groundwater Quality and Public Health" attempts to provide a platform for researchers, policy makers, and engineers to share their latest thoughts and new findings on this topic, as well as new methods to address groundwater pollution. The Special Issue will focus on understanding the relationship between groundwater quality and public health, and the current state of knowledge on the links between geological/geochemical processes and human health in the world. The factors accelerate or decelerate the geological/geochemical processes, thus affected human health will also be considered.

## Editor-in-Chief

### Dr. Jean-Luc PROBST

Laboratory of Functional Ecology  
and Environment, Centre  
National de la Recherche  
Scientifique (CNRS), University of  
Toulouse, Campus ENSAT,  
Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
