Deadline for manuscript
submissions:

31 July 2021

Message from the Guest Editor

Dear Colleagues,

The overall focus of this Special Issue will be to highlight the recent breakthroughs in development of sustainable construction materials. In addition, this issue will focus on the design and deployment of sustainable construction technologies and practices. Even though the scope of this issue is wide, original articles related to Engineering (generally but not limited to Civil Engineering) and Materials (generally construction materials) are solicited. The purpose of this Special Issue is to promote a wider use of sustainable materials and technologies in the construction industry and to reduce the carbon footprint of this industry. In this Special Issue, in addition to experimental work, articles highlighting sustainable design, life cycle analysis of materials, use of recycled materials, alternative binding materials, durability leading to increased service life, green building envelopes, hybrid structures using more than one type of construction material, etc. are sought. Articles focused on case studies and documenting the deployment of sustainable technologies are also encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
