

Additional file S8. Heatmaps with the top 10 differentially methylated positions (DMPs) in some FTD comparisons performed in brain samples.

Each CpG obtained has the associated gene beside. **(a)** Brain C9orf72 vs. CTRL; **(b)** Brain sFTD-Tau vs. CTRL; **(c)** Brain sFTD-TDP43 vs. CTRL. Abbreviations: C9orf72, familial frontotemporal dementia caused by mutation in *C9orf72* gene; sFTD-Tau, sporadic frontotemporal dementia with tau deposits; sFTD-TDP43, sporadic frontotemporal dementia with TDP43 deposits; LCLs, lymphoblastoid cell lines.
