# Message from the Editor-in-Chief

*BioTech* is an open access journal committed to the publication of methodological approaches and applications based on modern biotechnologies.

The journal covers expanding knowledge in various branches of science, ranging from the biology and medicine of humans to the biology and biotechnology of animals or plants. Original articles, timely reviews and short communications that use biotechnologies, such as genetic engineering, next-generation sequencing and omics technologies, to provide solutions for challenges in medicine as well as applied microbiology and crop and animal improvement are welcome. We invite you to publish your next paper with us.

## Editor-in-Chief

Prof. Dr. Massimo Negrini

---

## Aims

*BioTech* (formerly High-Throughput, ISSN 2571-5135; Microarrays, ISSN 2076-3905) is a multidisciplinary peer-reviewed scientific journal which provides an advanced forum for investigations related to the study and application of biotechnology. The journal encourages scientists to publish their experimental and theoretical results in the different fields of biotechnology, such as genomics, proteomics, applied immunology, recombinant gene techniques and development of pharmaceutical therapies. All the applications of biotechnology in the field of medicines as well as the production of food, pharmaceuticals, chemical products and energy sources will also be considered. Of particular interest is medical biotechnology with its applications aimed at improving the health of human beings.

The full experimental or methodological details must be provided so that the results can be reproduced. *BioTech* publishes reviews, regular research papers, communications and short notes, and there is no restriction on the maximum length of the papers.

---

## Scope

- Medical biotechnology, including: Clinical genetics, New medicines and therapies, Drug discovery and development, etc.
- Microbial biotechnology, including: Recombinant microorganisms, Metabolites, Microbial pharmaceuticals, etc.
- Plant biotechnology, including: Genetically modified plants, Plant breeding, Plant genome sequences and bioinformatics, etc.

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

### No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

### Rapid Publication

A first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 6.8 days (median values for papers published in this journal in the second half of 2023)
